SECURITY CONSULTING

Company Profile · 2026

InterSafe Security Consulting

Risk-based security decisions, ready to implement.

A licensed Saudi security consulting firm helping organizations assess their risks, define their guarding requirements, build security plans and procedures, support compliance, and train their people.

What our clients gain

01	Clear security requirements	Based on actual risks and the nature of the facility and its operations.
02	Informed operating decisions	On how guards, shifts and resources are deployed.
03	Plans that work in practice	Assessment findings turned into procedures that can be implemented and measured.

01 Who We Are

InterSafe Security Consulting is a Saudi company founded in 2025 and based in Riyadh, licensed by the Supreme Authority for Industrial Security (SAIS) to practice security consulting.

We work with decision-makers and with security, operations and procurement managers to answer practical questions: Which risks matter most? What size of guard force is right, and how should it be managed? Which plans and procedures does the facility actually need?

02 Why InterSafe

Field and leadership experience	Work is led by a founder with more than thirty years in security, leadership and training.
Risk linked to operations and cost	Recommendations that balance risk, operational need and cost.
A methodology adapted to each facility	We apply a structured methodology and tools adapted to the nature of each facility and its operations.
Clarity before work begins	Scope, deliverables and timeline are agreed in writing first.
Specialists where needed	Specialists in specific fields are engaged as each assignment requires, under our technical supervision.

03 Leadership

Mohammed Hadi Aldosari

Founder & Security Consultant

Leads the company's work and provides technical oversight of its deliverables. A security consultant licensed by SAIS, with more than thirty years of experience in security and leadership, including about twenty-four years in training and capability development. This experience informs our risk assessment, guarding and training services.

Qualifications

- Master's in Security Studies (Civil Protection) — Naif Arab University for Security Sciences
- Bachelor of Military Sciences — King Khalid Military College
- Certified Protection Officer (CPO) — International Foundation for Protection Officers (IFPO)

Founder's Previous Experience

- King Khalid Military College — leadership and training roles
- Security training for the NEOM project through BROOZ
- Contracted border management work with the International Organization for Migration (IOM)

04 Services

01 Guard Force Requirements & Performance

The issue	Guard numbers estimated without a documented needs analysis, uneven coverage across posts and shifts, or no clear way to measure the provider's performance.
Scope	Review of security posts, their duties and operating hours; shifts and coverage; relief calculation; supervision levels; comparison of in-house, contracted and hybrid models; and performance indicators.
Example deliverables	Post and coverage matrix · Staffing and relief calculation · Supervision structure · KPIs and improvement plan

02 Security Risk & Vulnerability Assessment

The issue	Risks that are not prioritized, or measures not reviewed against actual threats.
Scope	Identifying critical assets, analyzing threats and vulnerabilities, and reviewing existing procedures and systems on site.
Example deliverables	Risk register · Prioritized treatment plan

03 Security Plans & Procedures

The issue	Undocumented security practices or unclear responsibilities.
Scope	Security policy and plan, standard operating procedures, roles and responsibilities, and security incident response procedures.
Example deliverables	Security plan · Clear procedures and responsibilities

04 Compliance Support

The issue	Unidentified gaps between current practice and applicable security requirements.
Scope	Gap analysis, organizing documentation and requirements, and audit readiness within our licensed scope. Approval decisions remain with the competent authority.
Example deliverables	Gap matrix · Closure plan

05 Specialized Security Training

The issue	Training needs that generic programs do not cover.
Scope	Needs analysis, then design and delivery of programs for guards, supervisors and security managers.
Example deliverables	Training program · Training materials · Assessment tools

Final deliverables are set in each assignment's proposal according to the agreed scope.

05 How We Work

01 Understand the facility An initial meeting to understand the facility, its objectives and available documents.	02 Agree the scope A technical and financial proposal setting scope, deliverables and timeline.	03 Collect and analyze Site visits, interviews and document review, followed by assessment and analysis.	04 Deliver and discuss A report of findings, recommendations and implementation priorities, discussed with your team.
--	--	---	--

Any follow-up or implementation support is provided as agreed.

06 Confidentiality

We treat facility information and documents as confidential, limit access to those involved in the work, and follow the agreed controls for handling, returning or disposing of them when the work ends. We are ready to sign a non-disclosure agreement on request.

07 Licenses & Registration

Activity License (Security Consulting) — Supreme Authority for Industrial Security Expires 05 May 2029	2610000369
Founder's individual security consulting license — Supreme Authority for Industrial Security Expires 24 Dhu al-Qadah 1449 AH	25001132063
Unified National Number	7052669525
Riyadh Chamber membership	1218710

Registered name: Intersafe Company For Security Consultancy · Limited liability company (single-person, professional)

Next step: an initial meeting

We suggest an initial meeting to understand your facility's needs and define the right scope, followed by a written proposal setting out scope, deliverables and timeline.
